

September 2019 NPL Proposed Rule**Potential Sites for September 2019 Proposed Rule:**

Reg.	State	Site Name	City/County	Notes
Nonresponsive based on revised scope				
3	DE	Blades Groundwater Plume	Blades	PFOA/PFOS; non-compliance with RCRA
Nonresponsive based on revised scope				

Potential Sites for September 2019 Final Rule:

Reg.	State	Site Name	City/County	Notes
Nonresponsive based on revised scope				

Potential Sites for September 2019 Proposed Rule:

Site Name & Location	Site Information	Estimated RA Cost
Nonresponsive based on revised scope		

<p>Region 3</p> <p>Blades Groundwater Plume</p> <p><i>Blades, DE</i></p>	<p>Background (former site use): Two co-mingled groundwater plumes from two electroplating facilities, one currently active and one former, as potential sources.</p> <p>Contaminants of Concern: PFOA/PFOS and chromium exceeding benchmark levels in groundwater and soil. Cyanide below benchmark in groundwater and soil.</p> <p>PRP Information: PRPs have not yet been definitively identified but potential facilities include Procino Enterprises (viable) and Peninsula Plating (viable).</p> <p>Stakeholder Input: The state/governor is anticipated to support listing. The town of Blades owns/operates the municipal wells and the treatment system and has requested that EPA hold public meetings at major junctures in the site assessment process.</p> <p>Notable Site Issues: Both facilities are in the state's voluntary cleanup program but very limited investigation and cleanup work has been done. The facilities have been in non-compliance with RCRA in the past and have had EPA enforcement and removal actions conducted to contain and manage the contamination.</p> <p>Why list? Groundwater in the contaminated aquifers serve as the sole source drinking water for approximately 5,000 people living in the town of Blades who are served by 3 public and more than 100 private drinking water wells. Levels of PFOA/PFOS in groundwater exceed EPA's health advisory levels and levels of chromium and cyanide exceed MCLs. The residential area to the west of the site is a low-income area.</p>	<p>Ex. 5 Deliberative Process (DP)</p>
